A synthesis of science, cutting-edge technology, experience, and deep empathy.

Health is no coincidence - it results from the right interplay of many factors. Our mission is to support you on your path to optimal health by reducing immunological stressors and enhancing the body's natural regenerative processes. A one-dimensional approach simply won't do. We rely on state-of-the-art, biocompatible, and sustainable materials that are not only exceptionally well-tolerated but also aesthetically refined. The result: immune relief that strengthens your overall well-being, and a smile that boosts your

confidence - for a life full of energy and vitality.

Integrative biological dentistry combines scientific innovation with highly personalized care. We go beyond conventional treatment methods and harness innovative technologies to deliver tailored solutions. Whether it's dental restoration, the treatment of chronic inflammation and autoimmune conditions, or aesthetic and preventive care - we see the human being as a whole. With utmost care and sustainability.

DIAGNOSTICS

The human being is a complex interplay of lifestyle, systemic health, and overall well-being. Only with first-class diagnostics can we develop tailored therapies that bring the entire system into balance - and keep it there. We use the most advanced, innovative methods and highly precise technologies. Because only customized solutions lead to the best treatment outcomes.

Digital radiography (2D / 3D & AI-assisted analysis)
CaviTAU®-Ultrasound (FDOJ / NICO / Cavitations)
OroTox®-Dentaltoxinrapidanalysis
Immunological blood analysis
Regulatory / autonomic screening
Saliva analysis
Histological analysis and cytokine profiling
Individualized treatment planning

CARE

For us, prevention is far more than just routine - it's a cornerstone of our sustainable treatment concept. Healthy teeth and a well-functioning oral and jaw system are the foundation of your well-being. That's why we focus on biological dental cleanings, biocompatible cavity treatments, smart and safe amalgam removal, and gentle whitening. Our goal is to preserve and protect your oral health sustainably - today, tomorrow, and well into the future.

Sustainable prevention
Biological professional dental cleaning (PCR plus)
SMART safe amalgam removal
Biocompatible caries treatment
Biological periodontitis therapy
TMJ and jaw joint therapy (CMD)
Gentle teeth bleaching / whitening

REPAIR

The health of our teeth plays a vital role in our overall well-being and vitality. Removing immunological stressors can be the key. That's why we rely on state-of-the-art, innovative techniques in biological dentistry - from metal-free restorations and ceramic implants to biologically guided wisdom tooth removal. When it comes to "repair," we believe in our gentle, biocompatible methods support natural and well-tolerated regeneration - to stay as close to nature as possible.

Ceramic implants
Metal-free dental restorations and gentle metal detoxification in the mouth
Non-vital / root-treated teeth
Treatment of FDOJ and NICO (cavitations)
Chronic diseases
Soft tissue regeneration and grafting
Biological wisdom tooth removal
Optimization of wound healing and regeneration

PERFORMANCE

No matter where you currently stand - we meet you there, identify potential and possible weak points. With our Performance Program, we help you optimize your health. Whether before or after oral or maxillofacial procedures, or to enhance your athletic performance - optimal regeneration is the foundation for lasting results. Guiding you on your journey to becoming the best version of yourself. Step by step, toward a long and vibrant life.
